Use the Power of Digital World Besides Traditional Media

Visibility in digital world carries vital importance for your brand. Moneta Media Group conduct a policy which reach the sectors through digital platforms besides print sphere. And you, while preparing script work, take care of some basic tips and let the rest done by us.

5 vital steps for preparing SEO compatible content

1. Headlines should be as short as possible; while the lowest limit is 3 words. In addition, headline system should be formed using H1, H2 and H3 tags. Headline should be directly related with the subject, otherwise, Google perceives the situation and prevents your content from appearing at the results.
2. Keyword should be chosen and script should be prepared at the focus of the word. Keyword should appear on the headline, in the first and last paragraphs of the script. While a sole keyword can be chosen, this number can rise up to 5.
3. Script should consist of at least 300 words. The highest limit here is 2000 words.
4. It's critical that the prepared script is unique. In case Google detect copied content, they make the appearance of the script in search results impossible.
5. Visual usage is important. There should be at least two visuals, directly with the subject.

You can view the SEO compatible article we prepared for you and start applying above steps for your company's visibility at top rows.
